We start at 18:30

This is Us!

Wouter

Jeroen

Michiel

Eszter

Wouter - CEO & Founder of Codaisseur with over 20 years of experience in the IT field as a dev, ops, and sec specialist.

Jeroen - Jack of all trades, Hardware Hacker, with over 10 years of experience as an Electrical Engineering Specialist and Teacher.

Michiel - Behind the scenes Security Consultant, with over 30 years of experience as a Network Security specialist and System Administrator.

Eszter - Educational Specialist, keeping your teachers at their best and your course materials of excellent quality.

Technology is everywhere in the world

Every motivated person should be able to work with technology

This journey can be dramatically shortened

With deep focus and
the right conditions

Today’s schedule

18:30 - 19:00	✅ *Welcome!*
19:00 - 20:00	☐ Let’s get to know each other (games!)
20:00 - 20:15	☐ Break
20:15 - 20:45	☐ Course Overview
20:45 - 21:00	☐ Homework Introduction
21:00 - 22:00	☐ Tech Support*

** Feel free to log off when done.*

Let’s get to know each other!

<insert games>

2 Truths – 1 Lie

- You will each list two truths and one lie about yourself.
- The rest of the group has to vote on which one of the three statements is the lie.
- If you guess the lie of another person, you get a point and the person whose statements are up for voting gets as many point as many people he/she fooled.

E.g.: 10 people guess which of my statements is a lie and 5 do not, I get 5 points and the 10 people get one point each. The person with the most points wins

15 Minute Break

School Rules

Class hours:

Tuesdays and Thursdays

19:00 - 21:30

Late, ill or absent?

Tell us in **#absences**

Can’t do your work?

Tell us in **#errors**

Want help?

Tell us in **#issues**

What have you come here to learn?

Strong Independent Technologists With a Growth Mindset

Strong

- Healthy
- Emotionally Stable
- Persistent

Independent

- Proactive
- Start with the end in mind
- Do the most important thing first (prioritization)

Growth Mindset

- Skills & Intelligence can be grown and developed
- Focus on the process instead of the results
- Effort is an important part of learning
- Persevere through challenges
- Appreciate feedback and learn from it
- Treat mistakes as a learning opportunity

Results
Strategies
Mindset & behaviour

“I can do anything
with enough time”
